## PROFICIENCY CHECK — EVALUATION CRITERIA AND ASSESSMENT STANDARDS

|                |                   |                        |                                          |
|----------------|-------------------|------------------------|------------------------------------------|
| D-0507-ECA-001 | Issue 01 / Rev 00 | Ref:<br>OMA<br>D.2.9.1 | Pass: Grade ≥ 3 all areas; Overall ≥ 75% |
|----------------|-------------------|------------------------|------------------------------------------|

**PURPOSE:** This document defines the evaluation criteria and grade descriptors for all in-house proficiency checks conducted at D-0507 Flight Training Co., Ltd. Assessors (HT / FIE) shall use this document when completing Form D-0507-PCR-001. These criteria represent minimum standards; the HT may set higher standards for specific ratings.

## PART A — FLIGHT INSTRUCTOR (FI) EVALUATION CRITERIA

★ = **Safety-critical area.** An FI who receives Grade 1 or 2 in any safety-critical area shall be assessed as Unsatisfactory regardless of overall score.

| Evaluated area                 | What the assessor observes                                                                                  | Grade 1<br>Unsatisfactory                                              | Grade 2<br>Below Standard                                  | Grade 3<br>Satisfactory                                      | Grade 4<br>Above Standard                                         | Grade 5<br>Outstanding                                             |
|--------------------------------|-------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------|--------------------------------------------------------------|-------------------------------------------------------------------|--------------------------------------------------------------------|
| <b>Pre-flight preparation</b>  | Weather analysis, aircraft performance, fuel calc, student brief covering objectives & emergency procedures | No brief or significant omissions; weather/performance not checked     | Brief incomplete; key items missed; student unprepared     | Brief covers all required items; student adequately prepared | Brief thorough and well-structured; anticipates student questions | Exemplary brief; integrates real-time data; student highly engaged |
| <b>Airmanship ★</b>            | Safe, accurate, coordinated flight; situational awareness; adherence to SOPs                                | Unsafe act or deviation requiring intervention; significant SOP breach | Recurring minor deviation; inconsistent scan; limited SA   | Consistent safe operation; maintains awareness; follows SOPs | Precise control; proactive SA; anticipates traffic/terrain        | Masterful airmanship; consistently sets benchmark standard         |
| <b>Instructional technique</b> | Clarity of explanation; quality of demonstration; student-centred feedback                                  | Explanations unclear; poor or no demonstration; negative/              | Explanations inconsistent; demo inadequate; feedback vague | Clear explanation and demo; constructive feedback given      | Tailors method to student learning style; feedback specific       | Highly adaptive; outstanding feedback; student makes measurable    |

|                                |                                                                                                  |                                                             |                                                        |                                                             |                                                                     |                                                                      |
|--------------------------------|--------------------------------------------------------------------------------------------------|-------------------------------------------------------------|--------------------------------------------------------|-------------------------------------------------------------|---------------------------------------------------------------------|----------------------------------------------------------------------|
|                                |                                                                                                  | no feedback                                                 |                                                        |                                                             |                                                                     | le progress                                                          |
| <b>Emergency handling ★</b>    | Correct execution of emergency procedures without hesitation; use of memory items and checklists | Incorrect or delayed response; safety compromised           | Response correct but slow; checklist not used promptly | Correct memory items and checklist without hesitation       | Calm, precise, and methodical; maintains CRM throughout             | Anticipates developing situation; manages and debriefs perfectly     |
| <b>Post-flight debrief</b>     | Structure, specificity, and developmental focus of the debrief                                   | No debrief or generic praise only; no improvement actions   | Debrief unstructured; improvement actions vague        | Structured; specific points; improvement actions identified | Student-led elements; prioritised improvement areas; positive tone  | Highly developmental debrief; student produces own action plan       |
| <b>Regulatory compliance ★</b> | Flight conducted per CAAT regulations, AIP Thailand, and D-0507 SOPs                             | Regulatory violation; ATC clearance deviation not corrected | Minor deviation; relies on reminder from assessor      | Full compliance; no prompting required                      | Proactively identifies regulatory considerations and brief students | Demonstrates deep regulatory knowledge; uses as teaching opportunity |
| <b>Documentation</b>           | Accuracy and completeness of flight log, training record, and required forms                     | Log not completed or contains significant errors            | Log completed late or with minor inaccuracies          | Log accurately completed post-flight                        | Log completed promptly and thoroughly; includes learning points     | Documentation exemplary; used as student teaching reference          |

## PART B — THEORETICAL KNOWLEDGE INSTRUCTOR (TKI) EVALUATION CRITERIA

★ = **Safety-critical area**. A TKI who receives Grade 1 or 2 in any safety-critical area shall be assessed as Unsatisfactory regardless of overall score.

| Evaluated area | What the assessor observes | Grade 1Unsatisfactory | Grade 2Below | Grade 3Satisfactory | Grade 4Above | Grade 5Outstanding |
|----------------|----------------------------|-----------------------|--------------|---------------------|--------------|--------------------|
|----------------|----------------------------|-----------------------|--------------|---------------------|--------------|--------------------|

|                               |                                                                                 |                                                           | Standard                                                       |                                                            | Standard                                                         |                                                                       |
|-------------------------------|---------------------------------------------------------------------------------|-----------------------------------------------------------|----------------------------------------------------------------|------------------------------------------------------------|------------------------------------------------------------------|-----------------------------------------------------------------------|
| <b>Lesson preparation</b>     | Lesson plan prepared; stated objectives; materials and aids ready before class  | No lesson plan; unprepared; materials missing             | Lesson plan exists but incomplete; some materials missing      | Lesson plan prepared; objectives stated; materials ready   | Well-structured plan with differentiated activities              | Comprehensive plan with contingencies; seamlessly executed            |
| <b>Subject knowledge ★</b>    | Accuracy of content; correct regulatory references; ability to answer questions | Significant factual errors; incorrect regulatory citation | Minor errors; struggles with questions beyond syllabus         | Content accurate; references correct; questions answered   | Deep knowledge; links theory to practical; uses current examples | Expert-level knowledge; elevates content beyond syllabus requirements |
| <b>Teaching methodology</b>   | Delivery clarity; use of aids; pace and structure appropriate to student level  | Delivery unclear; aids not used; pace inappropriate       | Delivery inconsistent; aids used ineffectively; pace misjudged | Clear delivery; aids used effectively; pace suitable       | Varied delivery methods; aids enhance understanding              | Innovative methodology; all students demonstrably understood          |
| <b>Student engagement</b>     | Questions encouraged; understanding checked throughout; inclusive participation | No questions; no comprehension checks; passive students   | Limited questioning; checks only at end                        | Questions encouraged; understanding verified during lesson | Stimulates discussion; draws in quieter students                 | Highly interactive; students construct knowledge collaboratively      |
| <b>Assessment technique ★</b> | Assessment aligned to objectives; feedback constructive and developmental       | Assessment not aligned; feedback absent or demotivating   | Assessment partly aligned; feedback vague                      | Aligned assessment; constructive feedback given            | Assessment well-designed; feedback specific and developmental    | Assessment drives learning; feedback transforms student performance   |

|                                                                                                                                                                                                                                 |                                                                                         |                                                              |                                          |                                        |                                                                 |                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|--------------------------------------------------------------|------------------------------------------|----------------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------------|
| <b>Regulatory compliance ★</b>                                                                                                                                                                                                  | Course content meets CAAT theoretical knowledge requirements; correct standards applied | Content does not meet CAAT requirements; incorrect standards | Partial compliance; some regulatory gaps | Fully compliant with CAAT requirements | Exceeds minimum; references ICAO/EASA comparisons where helpful | Demonstrates regulatory mastery; keeps content ahead of updates     |
| <b>Documentation</b>                                                                                                                                                                                                            | Attendance register, progress records, and required forms completed accurately          | Records not completed; attendance not taken                  | Records incomplete or delayed            | All records accurately completed       | Records completed promptly; includes narrative progress notes   | Documentation comprehensive; used as evidence base for student file |
| <b>NOTE:</b> These criteria are minimum standards. The Head of Training may establish higher standards for specific ratings, aircraft types, or advanced instructional roles.   Use with Form D-0507-PCR-001   OMA Ref: D.2.9.1 |                                                                                         |                                                              |                                          |                                        |                                                                 |                                                                     |
