

HAZARD  
IDENTIFICATION  
FORM

Identify, assess, and propose mitigation for  
safety hazards

|                |                  |             |
|----------------|------------------|-------------|
| Hazard Title:  | Date Identified: | Ref. No.:   |
|                |                  |             |
| Identified by: | Location:        | Department: |
|                |                  |             |

Describe the hazard, unsafe condition, or potential source of harm:

| RISK ASSESSMENT MATRIX    |          |              |              |            |                    |
|---------------------------|----------|--------------|--------------|------------|--------------------|
| Severity ↓ / Likelihood → | 1 — Rare | 2 — Unlikely | 3 — Possible | 4 — Likely | 5 — Almost Certain |
| 5 — Catastrophic          |          |              |              |            |                    |
| 4 — Critical              |          |              |              |            |                    |
| 3 — Marginal              |          |              |              |            |                    |
| 2 — Minor                 |          |              |              |            |                    |
| 1 — Negligible            |          |              |              |            |                    |

High Risk — Immediate action

Medium Risk — Action required

Low Risk — Monitor

|                   |                 |                   |             |
|-------------------|-----------------|-------------------|-------------|
| Likelihood (1–5): | Severity (1–5): | Risk Score (L×S): | Risk Level: |
|                   |                 |                   |             |

☐ High   ☐ Medium   ☐ Low   —   Residual risk acceptable:   ☐ Yes   ☐ No — requires further action

|              |                               |
