

D-0507 FLIGHT TRAINING CO., LTD.

PROFICIENCY CHECK — EVALUATION CRITERIA AND ASSESSMENT STANDARDS

D-0507-ECA-001 Issue 01 / Rev 01 Ref: OMA D.2.9.5 Pass: Grade ≥ 3 in ALL areas

PURPOSE: This document reproduces the evaluation criteria and grade descriptors defined in OMA D.2.9.5 for all in-house proficiency checks conducted at D-0507 Flight Training Co., Ltd. Assessors (HT / CFI / CTKI / FIE) shall use Part A when completing Form D-0507-PCR-FI-001 and Part B when completing Form D-0507-PCR-TKI-001. Where this document and OMA D.2.9.5 differ, OMA D.2.9.5 governs.

PART A — FLIGHT INSTRUCTOR (FI) EVALUATION CRITERIA

★ = **Safety-critical area**. Grade 2 or below in the safety-critical area (Safety and Airmanship) is an automatic fail. Grade 1 in any area is an automatic fail. Grade 2 in more than two non-safety-critical areas is a fail; Grade 2 in one or two non-safety-critical areas is a Marginal Pass. There is no overall percentage requirement.

Evaluated area	What the assessor observes	Grade 1Unsatisfactory	Grade 2Below Standard	Grade 3Satisfactory	Grade 4Above Standard	Grade 5Outstanding
Pre-flight Briefing	Lesson structure, objectives stated, weather covered, emergency procedures, student preparation confirmed	No brief given, or objectives and emergency procedures omitted; weather not covered	Brief delivered but unstructured; objectives vague; a required item missed; student left unprepared	Brief covers lesson structure, objectives, weather and emergency procedures; student preparation confirmed	Brief thorough and well-structured; anticipates student questions; objectives linked to the syllabus stage	Exemplary brief; integrates current conditions and real-time data; student demonstrably prepared and engaged
Demonstration and Technique	Accuracy of manoeuvre, ATO standard technique, correct airspeed / altitude management	Manoeuvre flown inaccurately or not to ATO technique; airspeed or altitude not controlled	Demonstration recognisable but imprecise; recurring deviations in airspeed or altitude	Manoeuvre accurate and flown to ATO standard technique; airspeed and altitude held within tolerance	Demonstration precise and repeatable; tolerances comfortably bettered; technique clearly modelled for the student	Benchmark demonstration; handling used deliberately as the teaching reference
Instructional Pattern	Clarity, correct sequence, standard	Pattern unclear or	Pattern inconsistent	Clear pattern in correct	Pattern concise and	Pattern exemplary;

	phraseology, appropriate pace, absence of negative habits	absent; sequence incorrect; non-standard phraseology; negative habits evident	; sequence occasionally out of order; pace mismatched to the student	sequence using standard phraseology at a pace the student can follow; no negative habits	well-timed; wording adapted when the student does not follow	commentary and handling fully integrated; student follows without prompting
Student Management	Recognition of errors, intervention timing and method, correction technique	Errors not recognised, or intervention late or unsafe; correction not given	Errors recognised late; intervention heavier than required; correction unclear	Errors recognised promptly; intervention timed and sized appropriately; correction understood by the student	Allows productive errors to develop safely before intervening; correction targeted and confidence-building	Manages student workload throughout; correction produces measurable improvement within the sortie
Safety and Airmanship ★	TEM application, situational awareness, decision-making, go-around judgment	Unsafe act or deviation requiring intervention by the assessor; threats and errors not managed	Recurring minor deviations; inconsistent scan; limited situational awareness; go-around decision delayed	Threats and errors identified and managed; situational awareness maintained; sound decisions including go-around judgment	Anticipates threats before they develop; decisions proactive; go-around criteria briefed and applied	Masterful TEM and airmanship; consistently sets the benchmark standard for the ATO
Post-flight Debrief	Structure, specific feedback, improvement actions identified, student motivation maintained	No debrief, or generic praise only; no improvement actions identified	Debrief unstructured; feedback general; improvement actions vague	Structured debrief; specific feedback; improvement actions identified; student motivation maintained	Student-led elements; improvement areas prioritised; tone keeps the student motivated	Highly developmental debrief; student produces their own prioritised action plan
Documentation	Accuracy and completeness of	FRAE, AFM or student training	Records completed late or with	FRAE, AFM and student training	Records completed promptly	Documentation exemplary;

	FRAE, AFM, student training records	record not completed, or containing significant errors	minor inaccuracies	records accurate and complete	and thoroughly; includes learning points for the next sortie	used as a reference for the student's continued training
--	-------------------------------------	--	--------------------	-------------------------------	--	--

PART B — THEORETICAL KNOWLEDGE INSTRUCTOR (TKI) EVALUATION CRITERIA

★ = **Safety-critical area**. Grade 2 or below in the safety-critical area (Delivery) is an automatic fail. Grade 1 in any area is an automatic fail. Grade 2 in more than two non-safety-critical areas is a fail; Grade 2 in one or two non-safety-critical areas is a Marginal Pass. There is no overall percentage requirement.

Evaluated area	What the assessor observes	Grade 1Unsatisfactory	Grade 2Below Standard	Grade 3Satisfactory	Grade 4Above Standard	Grade 5Outstanding
Lesson Planning	CAAT syllabus alignment, learning objectives defined, appropriate duration, materials prepared	No lesson plan; content not aligned to the CAAT syllabus; materials missing	Plan incomplete; objectives implied rather than defined; duration misjudged; some materials missing	Plan aligned to the CAAT syllabus; learning objectives defined; duration appropriate; materials prepared	Well-structured plan with differentiated activities; timing allows for questions	Comprehensive plan with contingencies; executed seamlessly to time
Delivery ★	Structure, clarity, correct technical content, approved materials, appropriate pace	Delivery unclear or unstructured; technical content incorrect; unapproved materials used	Delivery inconsistent; minor technical errors; pace misjudged for the class	Clear, structured delivery; technical content correct; approved materials used at a suitable pace	Varied delivery methods; content linked to operational practice; pace adjusted to the class	Delivery elevates the subject; every student demonstrably understands the safety-critical content
Student Engagement	Questioning technique, checking understanding, adapting to class response	No questioning; understanding never checked; class passive	Limited questioning; understanding checked only at the end	Questioning used throughout; understanding verified during the lesson; delivery adapted to	Stimulates discussion; draws in quieter students; adapts in real time	Highly interactive; students construct and test understanding collaboratively

				the class response		
Assessment	Assessment tools applied correctly, consistent marking, written feedback provided	Assessment not applied, or not aligned to the objectives; no feedback given	Assessment applied inconsistently; marking uneven; feedback vague or verbal only	Assessment tools applied correctly and marked consistently; written feedback provided	Assessment well designed; feedback specific and developmental	Assessment drives learning; feedback measurably changes student performance
Classroom Management	Attendance procedure, time management, student conduct managed	Attendance not taken; lesson overruns or ends early without cause; conduct not managed	Attendance taken late; timing slips; conduct issues left unaddressed	Attendance procedure followed; lesson runs to time; student conduct managed	Time managed with margin for questions; classroom climate professional and orderly	Classroom runs without visible intervention; students self-manage to the standard set
Documentation	Accuracy of attendance records, progress entries, JotForm submissions	Attendance records or progress entries not completed; results not submitted	Records incomplete or submitted late	Attendance records and progress entries accurate; results submitted as required	Records completed promptly; includes narrative progress notes	Documentation comprehensive; forms the evidence base for the student file
NOTE: These criteria are reproduced from OMA D.2.9.5 and are minimum standards. The Head of Training may set higher standards for specific ratings or courses, but may not lower them or alter the pass rules. They govern all three proficiency tiers — Tier 1 In-House IPC, the instructional observation element of Tier 2 LPC+, and Tier 3 Assessment of Competence.
